Section 100 of the Children and Families Act 2014 places a duty on the Trust Board and the Executive Leadership Team to make arrangements for supporting pupils at the Trust's academies with medical conditions. Pupils with special medical needs have the same right of admission to school as other children and cannot be refused admission or excluded from school on medical grounds alone.

However, teachers and other school staff in charge of pupils have a common law duty to act in the place of the parent and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

The prime responsibility for a child's health lies with the parent who is responsible for the child's medication and should supply the school with information.

This Policy will be reviewed regularly and will be readily accessible to Parents/Carers and staff through each Academies website.

Policy Implementation

All schools and academies are expected by Ofsted to have a policy dealing with medical needs and to be able to demonstrate that this is implemented effectively.

The overall responsibility for the successful administering and implementation of this Policy is given to Stuart Ellis, Chief Executive Officer. He will also be responsible for ensuring that sufficient staff are suitably trained and will ensure cover arrangements in case of staff absences or staff turnover to ensure that someone is always available and on site.

The Headteacher/Head of School will be responsible for briefing supply teachers, risk assessments for school visits and other school activities outside of the normal timetable and for the monitoring of individual healthcare plans.

All staff will be expected to show a commitment and awareness of children's medical conditions. All new members of staff will be inducted into the arrangements and guidelines set out in this Policy.

Definitions of Medical Conditions:

Pupils' medical needs may be broadly summarised as being of two types:

- Short-term affecting their participation in School activities because they are on a course of medication.
- Long-term potentially limiting their access to education and requiring extra care and support (deemed special medical needs).

The Role of Staff

Some children with medical conditions may be disabled. Where this is the case the Trust must comply with their duties under the Equality Act 2010. Some may also have Special Educational Needs and may have a statement, or Education, Health and Care (EHC) plan which brings together health and social care needs, as well as their special educational provision. For children with SEN, this guidance should be read in conjunction with the SEN Code of Practice and the school's SEN Information Report.

If a child is deemed to have a long-term medical condition, the school will ensure that arrangements are in place to support them. In doing so, we will ensure that such children can access and enjoy the same opportunities at school as any other child.

The School, health professionals, Parents/Carers and other support services will work together to ensure that children with medical conditions receive a full education, unless this would not be in their best interests because of their health needs. In some cases this will require flexibility and involve, for example, programmes of study that rely on part time attendance at school in combination with alternative provision arranged by the Local Authority and health professionals. Consideration will also be given to how children will be reintegrated back into school after long periods of absence.

Staff must not give prescription medicines or undertake health care procedures without appropriate training (updated to reflect any Individual Health Care Plans). Likewise, staff must not undertake a physiotherapy programme without appropriate training.

At CHANGE Schools Partnership, we recognise that a first-aid certificate does not constitute appropriate training in supporting children with medical conditions. Healthcare professionals, including the school nurse, who each academy has regular access to, will provide training and subsequent confirmation of the proficiency of staff in a medical procedure, or in providing medication.

At all times, guidance in the CHANGE School Partnership's Intimate Care Policy must be followed.

Procedures to be followed when Notification is received that a Pupil has a Medical Condition

We will ensure that the correct procedures will be followed whenever we are notified that a pupil has a medical condition. The procedures will also be in place to cover any transitional arrangements between schools, the process to be followed upon reintegration or when pupil's needs change and arrangements for any staff training or support.

For children starting at one of the Trust's academies, arrangements will be in place in time for the start of the relevant school term. In other cases, such as a new diagnosis or children moving to one of the Trust's academies mid-term, we will make every effort to ensure that arrangements are put in place within two weeks.

In making the arrangements, the School will take into account that many of the medical conditions that require support at school will affect quality of life and may be lifethreatening.

We will also acknowledge that some will be more obvious than others. We will therefore ensure that the focus is on the needs of each individual child and how their medical condition impacts on their school life.

CHANGE Schools Partnership will ensure that arrangements give Parents/Carers and pupils confidence in the School's ability to provide effective support for medical conditions in school. The arrangements will show an understanding of how medical conditions impact on a child's ability to learn, as well as increase their confidence and promote self-care. We will ensure that staff are properly trained to provide the support that pupils need.

CHANGE Schools Partnership will ensure that arrangements are clear and unambiguous about the need to support actively pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so. The School will make arrangements for the inclusion of pupils in such activities with any adjustments as required unless evidence from a clinician such as a GP states that this is not possible.

CHANGE Schools Partnership will make sure that no child with a medical condition is denied admission or prevented from attending any of our academies because arrangements for their medical condition have not been made. However, in line with our Safeguarding duties, we will ensure that pupils' health is not put at unnecessary risk from, for example infectious diseases. We will therefore not accept a child in school at times where it would be detrimental to the health of that child or others.

In addition we will liaise with the Statutory Assessment Service over children with significant needs that require substantial practical adaptations to the learning environment.

CHANGE Schools Partnership does not have to wait for a formal diagnosis before providing support to pupils. In cases where a pupil's medical condition is unclear, or where there is a difference of opinion, judgements will be needed about what support to provide based on the available evidence. This would normally involve some form of medical evidence and consultation with Parents/Carers. Where evidence conflicts, some degree of challenge may be necessary to ensure that the right support can be put in place. This will usually be led by the School's SENCO or Headteacher/Head of School. Following the discussions an Individual Health Care Plan will be put in place.

Where a child has an Individual Health Care Plan, this should clearly define what constitutes an emergency and explain what to do, including ensuring that all relevant staff are aware of emergency symptoms and procedures. Other pupils in the School should know what to do in general terms, such as informing a teacher immediately if they think help is needed. If a child (regardless of whether they have an Individual Health Care Plan) needs to be taken to hospital, staff should stay with the child until the Parent/Carer arrives, or accompany a child taken to hospital by ambulance.

Individual Health Care Plans

Individual Health Care Plans will be written and reviewed by in conjunction with the SENCO, in partnership with parents and relevant school staff and relevant medical professionals. It will be the responsibility of all members of staff supporting the individual children to ensure that the Plan is followed. The class teacher will be responsible for the child's development and ensuring that they and their medical conditions are supported at school.

Individual Healthcare Plans will help to ensure that CHANGE Schools Partnership effectively supports pupils with medical conditions. They will provide clarity about what needs to be done, when and by whom. They will often be essential, such as in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed. They are likely to be helpful in the majority of other cases too, especially where medical conditions are long-term and complex. However, not all children will require one. The School, health care professionals and Parents/Carers should agree, based on evidence, when a Health Care Plan would be inappropriate or disproportionate. If consensus cannot be reached, the Headteacher/Head of School is best placed to take a final view.

Individual Health Care Plans will be easily accessible to all who need to refer to them, while preserving confidentiality. Plans will capture the key information and actions that are required to support the child effectively. The level of detail within plans will depend on the complexity of the child's condition and the degree of support needed. This is important because different children with the same health condition may require very different support. Where a child has SEN but does not have a statement or EHC plan, their SEN should be mentioned in their Individual Health Care Plan.

Health Care Plans, (and their Review), may be initiated, in consultation with the Parent/Carer, by a member of school staff or a healthcare professional involved in providing care to the child. The Individual Health Care Plan must be completed by the Lead Professional with support from Parents/Carers, and a relevant healthcare professional, e.g. school, specialist or children's community nurse, who can best advise on the particular needs of the child. Pupils should also be involved whenever appropriate. The responsibility for ensuring it is finalised and implemented rests with the School.

CHANGE Schools Partnership will ensure that Individual Health Care Plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed. They will be developed and reviewed with the child's best interests in mind and ensure that the School assesses and manages risks to the child's education, health and social wellbeing and minimises disruption. Where the child has a SEN identified in a statement or EHC plan, the Individual Health Care Plan should be linked to or become part of that statement or EHC plan.

Some children may have an Emergency Health Care Plan prepared by their lead clinician that could be used to inform development of their Individual Health Care Plan. The Emergency Health Care Plan will not be the School's responsibility to write or review.

The Child's Role in managing their own Medical Needs

If it is deemed, after discussion with the Parents/Carers, that a child is competent to manage their own health needs and medicines, the School will encourage them to take responsibility for managing their own medicines and procedures. This will be reflected within Individual Health Care Plans.

All medicines will be stored in the cupboard in the Medical Room to ensure that the safeguarding of other children is not compromised. CHANGE Schools Partnership does also recognise that children who can take their medicines themselves or manage procedures may require an appropriate level of supervision. If a child is not able to self-medicate then relevant staff should help to administer medicines and manage procedures for them.

The following are the procedures to be followed for managing medicines:

- Medicines should only be administered at the School when it would be detrimental to a child's health or school attendance not to do so.
- We will not administer non-prescription medicines to a child, if a Parent/Carer wishes a child to have the non-prescription medicine administered during the School day, they will need to come to the School to administer it to their child.
- CHANGE Schools Partnership will only accept prescribed medicines that are in-date, labeled, provided in the original container as dispensed by a pharmacist and include instructions for administration, dosage and storage. The exception to this is insulin which must still be in date, but will generally be available inside an insulin pen or a pump, rather than in its original container.
- All medicines will be stored safely in the Medical Room, unless another secure location is identified and agreed in their Health Care Plan that more successfully meets their needs. Children should know where their medicines are at all times and be able to access them immediately. Where relevant, they should know who holds the key to the storage facility, which will be the office staff.
- Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens should be always readily available to children. If a child requires an asthma inhaler it is crucial that there is an inhaler in the School at all times and this is the responsibility of the parent.
- During school trips, the first aid trained member of staff/member of staff in charge of first aid will carry all medical devices and medicines required.
- Staff administering medicines should do so in accordance with the prescriber's instructions. The School will keep a record of all medicines administered to individual children, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at the School should be noted.
- Written records are kept of all medicines administered to children. These records offer protection to staff and children and provide evidence that agreed procedures have been followed.
- When no longer required, medicines should be returned to the Parent/Carer to arrange for safe disposal. Sharps boxes should always be used for the disposal of needles and other sharps.

Unacceptable Practice

Although CHANGE Schools Partnership staff should use their discretion and judge each case on its merits with reference to the child's Individual Health Care Plan, it is not generally acceptable practice to:

- prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary
- assume that every child with the same condition requires the same treatment
- ignore the views of the child or their Parents/Carers; or ignore medical evidence or opinion, (although this may be challenged)
- send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans
- if the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable
- penalise children for their attendance record if their absences are related to their medical condition e.g. hospital appointments
- prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- require Parents/Carers, or otherwise make them feel obliged, to attend the School to administer medication or provide medical support to their child, including with toileting issues. No Parent/Carer should have to give up working because the School is failing to support their child's medical needs; or
- prevent children from participating, or create unnecessary barriers to children participating in any aspect of School life, including school trips, e.g. by requiring Parents/Carers to accompany the child.

Complaints

Should Parents/Carers or pupils be dissatisfied with the support provided they should discuss their concerns directly with the School. If for whatever reason this does not resolve the issue, they may make a formal complaint via the complaints procedure outlined in CHANGE Schools Partnership's Complaints Policy.
